**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) An electronic text and/or graphics presentation device including:

receiving means for receiving a card having a pattern encoding text and/or graphics of an entire document printed thereon, the receiving means incorporating a roller mechanism arranged to retract the card into the device;

scanning means arranged to scan a the printed pattern encoding text and/or graphics of an entire document as the card is retracted into the device by the roller mechanism;

user input control means;

processing means coupled to the scanning means, the programming means operatively programmed to generate a data signal corresponding to the text and/or graphics in response to a control signal from the user input control means; and

display means arranged to receive the data signal from the processing means and display the text and/or graphics.

2. (Original) An electronic text and/or graphics presentation device according to claim 1 including a foldable housing comprising first and second housing portions pivotal relative to each other.

3. (Original) An electronic text and/or graphics presentation device according to claim 2, wherein the first and second housing portions are each pivotally connected to a common spine.

4. (Original) An electronic text and/or graphics presentation device according to claim 3, wherein the spine includes a battery compartment.

5. (Cancelled)

6. (Cancelled)

3

7. (Currently Amended) An electronic text and/or graphics presentation device according to claim 62, wherein the roller mechanism is incorporated into the first housing portion.

8. (Original) An electronic text and/or graphics presentation device according to claim 7, wherein the first housing portion includes a window for observing a card retracted into the first portion.

9. (Currently Amended) An electronic text and/or graphics presentation device according to claim 1, ~~wherein the pattern encoding text and/or graphics is printed on a card~~ and wherein said device further includes including a card storage magazine.

10. (Currently Amended) An electronic text and/or graphics presentation device according to claim 2, ~~wherein the pattern encoding text and/or graphics is printed on a card~~ and wherein said device further includes including a card storage magazine formed in the second housing portion.

11. (Original) An electronic text and/or graphics presentation device according to claim 2, wherein the display means comprises a flexible LCD screen located across inner surfaces of the first and second housing portions.

12. (Original) An electronic text and/or graphics presentation device according to claim 11, wherein the flexible LCD screen is bi-stable.

13. (Original) An electronic text and/or graphics presentation device according to claim 3, including a recess for receiving a loop of a flexible LCD screen upon pivoting the first and second housing portions to a closed position in order that creasing of the LCD screen is avoided.

14. (Original) An electronic text and/or graphics presentation device according to claim 2 wherein first and second printed circuit boards are located in the first and second housing portions respectively.

4

15. (Original) An electronic text and/or graphics presentation device according to claim 14, wherein the flexible LCD screen may include conductive traces coupling the first and second printed circuit boards to each other.

16. (Original) An electronic text and/or graphics presentation device according to claim 1, wherein the user input control means comprises a joystick assembly.

17. (Currently Amended) An electronic text and/or graphics presentation device including:

a housing having a slot for receiving a card having a pattern encoding text and/or graphics of an entire document printed thereon;

a roller mechanism arranged to retract the card into the device through the slot;

a scan head arranged to scan ~~a~~ the printed pattern ~~corresponding to text and/or graphics of an entire document~~ as the card is retracted into the device by the roller mechanism;

a processor coupled to the ~~scanner~~ scan head and configured to generate data corresponding to the text and/or graphics; and

a display screen arranged to receive the data from the processor and display the text and/or graphics.

18. (Cancelled)
